

As a user, logged in or not, I want to be able to search for a medication using the search bar and pick a medication. Once picked I have the option to read information about the medication, including the unit price, ID, symptoms, reasons for use etc. This is so, before adding it to my profile or comparing it to another drug, I want to be able to know the information about the drug. I also want to know where I can find a drug on my list for cheap. Things are getting expensive nowadays and money is tight, so I want to know which pharmacies or websites that are trustworthy to go and buy these meds. A nice picture showing that I am getting the best price would be nice because I like seeing things rather than read about them.
