

As a new user I want to be able to know how to use the application. I'm not very well versed in technology and websites and I want to know what am I supposed to do to get the information I need. Maybe a rotating carousel of pictures or maybe animations can show me the steps of how to use the website and let me know its capabilities. I also want to know if it has any cool functions that I can show friends or family. I want to easily know how to use it without taking too much of my time because I am a busy person and I know that I need this information quickly if its urgent.
